PROFESSIONAL SUMMARY

Java Full Stack Developer with **4+ years** delivering scalable enterprise applications and event-driven microservices for **American Airlines**. Expertise in **Spring Boot, Apache Kafka, Microservices, and Angular**, processing **100K+ events daily** with sub-second latency. Reduced latency by 60% and achieved 99.9% reliability through robust system design on Azure Kubernetes Service.

TECHNICAL SKILLS

Languages: Java 8/11/17, TypeScript, JavaScript, SQL

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices

Frontend: Angular 12+, RxJS, HTML5, CSS3, Bootstrap, Reactive Forms

Event-Driven: Apache Kafka, Spring Kafka, Event-Driven Architecture, Pub/Sub Patterns

Cloud & DevOps: Azure, Azure Kubernetes Service (AKS), Docker, Kubernetes, Rancher, GitHub Actions

Security: OAuth2, JWT, Spring Security, Azure AD, Apigee API Gateway, HashiCorp Vault

Databases & Tools: MySQL, SQL Server, JPA/Hibernate, Dynatrace, Mezmo, SonarQube, IntelliJ, Postman, Git

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions

Apr 2022 – Present

Client: American Airlines (Dallas, TX)

Hyderabad, India

Associate – Backend Engineer (Eventing Platform)

Jan 2025 – Present

- Engineered a real-time **event-driven framework** processing **100K+ flight disruption events daily** with sub-second latency to trigger crew notifications, enabling faster operational recovery.
- Designed **Kafka streaming pipelines** using **Spring Kafka**, reducing notification latency by **60%** vs. legacy batch systems; built fault-tolerant consumers with manual acknowledgment, consumer groups, and partition-aware processing.
- Implemented **Dead Letter Topic (DLT)**, retry with exponential backoff, and idempotent message handlers using tracking IDs, achieving **99.9% data reliability** and zero message loss.
- Secured event streams and REST APIs using **Spring Security, OAuth2, JWT, and Azure AD**; integrated **Mezmo** (logs) and **Dynatrace** (APM), reducing issue resolution time by **40%**.
- Recipient of **Cognizant Cheers Bronze Award** for outstanding contributions to project deliverables.

Programmer Analyst – Full Stack Developer (Communication Systems)

Jan 2024 – Dec 2024

- Modernized legacy modules into a **Microservices Architecture** on **Azure Kubernetes Service (AKS)** via Rancher, supporting thousands of pilots and crew across operational hubs.
- Developed responsive **Angular dashboards** with reactive forms and RxJS for real-time broadcasts and emergency alerts; built Spring Boot REST APIs with **@ControllerAdvice** and **@Transactional** boundaries.
- Secured APIs via **Apigee API Gateway** (OAuth2, JWT, rate limiting) and managed secrets using **HashiCorp Vault**, eliminating hardcoded credentials.
- Optimized **SQL queries**, JPA fetch strategies, and N+1 elimination, reducing page load times by **30%** during peak windows; containerized services with Docker for AKS deployments with autoscaling.

Programmer Analyst – Full Stack Developer (Pilot Trip Trade System)

Oct 2022 – Dec 2023

- Delivered core features for the **Pilot Trip Trade System** enabling pilots to swap/drop flight sequences, processing **thousands of trade requests** monthly.
- Built intuitive **Angular UIs** (reactive forms, RxJS) and **Spring Boot** microservices for trade matching, eligibility validation, and audit logging with JWT-based RBAC.
- Wrote comprehensive unit tests with **JUnit and Mockito**, achieving **80%+ code coverage**.

Full Stack Java Intern

Apr 2022 – Sep 2022

- Built an **Audit Management System** prototype using Java, Spring Boot, and Angular; gained hands-on experience in REST API development and JWT authentication.

EDUCATION

Bachelor of Technology, Computer Science & Engineering

2018 – 2022

Sreenidhi Institute of Science and Technology (SNIST), Hyderabad

CGPA: 7.56/10

CERTIFICATIONS

Programming in Java – NPTEL | **UI Technologies** – Durgasoft Software Solutions | Smart India Hackathon Participant
| Active on LeetCode & HackerRank

SOFT SKILLS

Collaboration and Teamwork | Strong Communication Skills | Problem-Solving and Analytical Thinking | Adaptability
